

# Miguel Arévalo

Software Engineer

miguelarevalo1999@gmail.com | <https://miguelarevalo1999.github.io/>

## Skills

**Programming languages:** Java, Python, Javascript, (HTML & CSS), SQL.

**Frameworks and Tools:** Spring Boot, Maven, Git, Postman, Oracle Cloud, Azure, GCP, MySQL, Oracle Database.

## Experience

---

**IC1 (Software Developer),** Oracle – Zapopan Jalisco, Mexico. Sept 2022 – Sept 2023

- Designed and implemented a command-line interface (CLI) for Oracle Database and Grid Infrastructure Installers for 23ai release, enhancing usability, automation, and accessibility for developers and system administrators.
- Improved the Installer software quality by addressing 250+ bugs across multiple software versions, reducing deployment time and ensuring consistent software stability.
- Refactored Installer legacy code to improve reliability, scalability and maintainability.

**IC2 (Member of Technical Staff),** Oracle – Zapopan Jalisco, Mexico. Sept 2023 – Present

- Designed and implemented REST APIs and Java-based services to enable cloud operations for EXADB-XS 19c in DBaaS tooling, improving automation for database lifecycle management (provisioning, scaling, patching).
- Developed Java plugins for ASM disk and diskgroup management (create/resize/delete), enhancing DBaaS tooling for EXADB-XS 19c version.
- Optimized Grid Infrastructure cloud workflows by migrating to the new CLI-based approach, improving deployment reliability.
- Reduced multi-node Grid Infrastructure software time deployment by 3x by implementing Java thread-pooled parallel operations.
- Acted as a mentor for new hires, providing guidance on best practices, onboarding processes, and technical problem-solving.

## Certifications

---

**Google Cloud Computing Foundations, Google**

**English TOEFL ITP – B2**

## Education

---

**ESCOM-IPN – Bachelor of Science in Computer Systems Engineering**

Jan 2018 – Jul 2022
